

Pocket Guide to Low Cost Medications

This reference is brought to you free of charge, compliments of the Butler University Drug Information Service. This resource is designed to increase prescriber awareness of medication costs and to encourage evidence-based prescribing in a cost-effective manner. We do not promote any specific drug product, program, or pharmacy chain. The medications listed in this book are those that are in the official low-cost programs offered by various pharmacies in central Indiana. The patient costs for the various programs are as follows:

- CVS pharmacy offers a Health Savings Pass card, for an annual fee of \$10 per person. Then the items included in the program are \$9.99 for a typical 90 day supply of the generic medications listed. The Health Savings Pass card also gives 10% discounts at the Minute Clinics inside select CVS stores.
- Kmart Pharmacy offers many low cost medications at a variety of prices. Some are \$5 for a one-month supply, others are \$10 or \$15 for a three month supply, and still others are \$25. There is no annual fee.
- Kroger Pharmacy offers many generic medications for \$4 for a 1 month supply or \$10 for a 3 month supply. Most of their women's health products are \$9 for a one month supply and \$24 for a 3 month supply.
- Marsh Pharmacy offers a one month supply of select prenatal vitamins for free.
- Meijer Pharmacy offers select antibiotics for free. This offer excludes extended release formulations and is for a maximum 14 day supply at typical oral doses. They also offer 30 day supplies of select prenatal vitamins for free.
- Target Pharmacy's program offers a typical 1 month supply for \$4, and 3 month supply for \$10. Ventolin HFA, bupropion SR, and women's health products are \$9 for a one month supply and \$24 for a 3 month supply.
- Walgreens offers the Prescriptions Savings Club. One must pay an annual fee of \$20 per year for an individual or \$35 per year for a family. Then, three month supplies of various generic products are \$12, with the exception that birth control products are \$12 for a one month supply. **Persons enrolled in publicly funded health care programs (such as Medicare, Medicaid, or TRICARE) are ineligible.**
- Walmart offers most the generic medications in their program for \$4 for a 1 month supply and \$10 for a 3 month supply. Women's health products are generally \$9 for a 1 month supply and \$24 for a three month supply. Most pharmacies will match competitor's prices when patients specifically ask for a price match (as long as it does not result in selling medications below the pharmacy's acquisition cost.) Encourage patients to ask about price matching programs at their pharmacy of choice.

KEY

CVS = CVS

KM = Kmart

KRO = Kroger

MAR = Marsh

MEI = Meijer

TAR = Target

WAG = Walgreens

WM = Walmart

X = cost <\$10

XX = cost \$11 - \$15

XXX = cost \$16 - \$25
