

Documentation Guidelines for Attention Deficit Disorder

Documentation should state a diagnosis and the functional limitations of the disability within an educational setting. Typically, it should be printed or typed on official letterhead or on the following SDS documentation form. **Documentation should be completed and signed by an evaluator qualified to make the diagnosis and with whom the student has a personal medical relationship.** Documentation from family members, even if qualified professionals, cannot be accepted.

The following is a guideline for submitting documentation to establish eligibility for accommodations and support services through SDS. Other forms of documentation are often accepted. Students who currently hold documentation are encouraged to contact SDS for a brief discussion as to whether or not additional documentation is needed.
