MS365 Information Technology II	3	
University Elective 3	3	
LSB302 Professional and Career Development 6	1	
Total	16	122

Notes:

- This is a general guide. Some classes may be moved up or back with no negative impact to progress.
- Any credits the student brings from the high school experience (AP or IB test credits or dual credits, for example) may be used to lighten the load in a particular semester or reduce the number of summer credits required.
- MA106 Calculus may be substituted for MA125 Business Calculus.
- The Foreign Language requirement must be at least at the 200 level. If the student must begin at the 100 level, those classes may be taken as LAS Electives.
- If math placement results require the student to enroll in MA101 Algebra prior to MA125, MA101 will be an LAS elective. Changes can be made to keep the student on track overall. MA125 should be completed no later than Spring One.
- The shorter schedule can make it more difficult to double major in business disciplines or add a minor, but it might be done with careful planning.
- This plan anticipates that Fall Three will be done as a study abroad semester. If that is the case, GHS 2 (Global and Historical Studies) is converted into an additional University Elective.
