

New procedure for logging in to GPS.Butler.edu

As was communicated during the recent GPS training, we have been able to sync GPS.Butler.edu to our Butler systems so they will share the same logon and you will not have to maintain a separate password for GPS.

To facilitate the change you will need to login via a new system that will require you to answer some security questions, as shown below. This system will be used in numerous systems going forward (PowerDMS users are already using this method, for example). Simply go to **GPS.Butler.edu** and you will be re-directed to the appropriate login page.

- Delete the cache and cookies from your browser. (The help desk can assist you with this.)
- Enter your Butler username (without the @butler.edu) and password

Login

Login

[Login Help](#)

Note: In Internet Explorer you may see some errors flashing on the screen. You can proceed through the login process.

- Once you login, you will need to answer some security questions.
