PA NEEDED FOR ORTHOPEDICS IN BLOOMINGTON, INDIANA

Job Post:
https://www.healthcaresource.com/iuhealth/index.cfm?fuseaction=search.jobDetails&template=dsp_job_details.cfm&cJobId=100128556

The selected candidate will be part of an excellent team of orthopedic providers that have an outstanding reputation in the Bloomington, IN area. He/She will be working closely with a hand and upper extremity surgeon on all aspects of care in upper extremity conditions from trauma, arthritis, nerve and soft tissue conditions in addition to general orthopedics when on call. Call is very limited and is not taxing at all. It is a very much a mentorship type of approach until the candidate is capable of taking on tasks more independently. This is a hybrid Operating Room/Clinic role but largely focused in the outpatient clinic setting.

The work mentality and ethic is an excellent combination between very high quality of work life balance and great efficiency while at work.

Candidates can call/email me directly with questions and for further details.

Sincerely,

Tarek
Cell: 832 661 5727
