Position Description

CFPM is seeking a dedicated and quality focused Nurse Practitioner or Physician Assistant to join our Interventional Pain Management physician at our Greenwood and Lafayette Indiana office locations. These are Full Time. The Advanced Practitioner is responsible for providing all aspects of office based care, new patient evaluation, follow up care including responsible pharmacological management and treatment with both opioid and non-opioid medication regiments.

The evaluation of response to procedures (evaluation post procedure) and adjusting the differential diagnosis to steer future care and procedures.

These decisions are collaboratively based and protocol driven by a combination of best practices and evidenced based medicine.

The Advanced Practitioner will consult with the physician as needed according to the outlined collaborative or supervisory agreement. The primary goal for the Interventional Pain Management midlevel is to make a significant contribution to the development and direction of the practice to provide multidisciplinary care including: medications, injections, implantable therapies, physical therapy, functional restoration and coordination of behavioral and mental health patient care to improve quality of life and functioning.

Based upon technical ability and training the advanced practitioner may fill intrathecal pumps follow SCS implants and perform Minor Injections such as trigger points and joint injections; (but no spinal interventional or image guided treatments).

Center for Pain Management is one of the oldest/established 1993, free standing multidisciplinary non-hospital affiliated pain centers in the Midwest with 3 current locations in Indianapolis, Greenwood and Lafayette. We offers a rewarding work environment with many opportunities for growth in a fast-paced but family centered company. We offer a supportive, learning environment facilitated through a consultative relationship with the supervising physician. If you share our
commitment to providing quality patient care within an 8 am to 5 pm supportive work team environment we invite you to apply.

**Job Duties Responsible:**

- Evaluation and management of complex patients with diagnosis ranging from low back and neck pain to post laminectomy syndrome and intractable pain with myelopathy not amenable to further surgical correction or operation.
- Myofascial pain / Fibromyalgia to Hyperalgesia and central sensitization;
- RSD and Complex regional pain syndrome, abdominal and pelvic pain and cancer related or treatment related pain syndromes.
- Taking histories, performing physical examinations ordering diagnostic tests, imaging in order to develop a differential diagnosis and implementation of a multidisciplinary plan including ordering interventional care and pharmacological management.
- Follow up and adjusting the continuum of care as indicated.
- Documentation is based on Allscripts EMR, with our templates developed over the past 10 years. Good oral and written communication skills, problem-solving and organizational skills are required.
- The candidate will at times be required and be able to handle behaviorally complicated patients that may be suffering from both depression and anxiety, and may have had negative prior experiences with another team while trying to seek care and treatment.
- Requires Masters in Nursing or Physician Assistant Degree from an accredited school of Adult or Family Nurse Practitioner or Physician Assistant Studies Program.
- Requires Certification as a Physician Assistant or Nurse Practitioner from the state of Indiana. With unlimited Indiana controlled substances registration certification and comfortable in writing class II to V controlled substances.

Good references and clean licensure with Zero tolerance for past board or DEA issues is required.
