

Community Regional Medical Center (CRMC), in conjunction with Community Health Partners, is recruiting a Physician Assistant to join their practice. Community Health System is the region's largest healthcare provider and private employer, with over 9,000 employees. The system is comprised of four acute care hospitals, including CRMC, the only Level 1 Trauma Center between Los Angeles and Sacramento. CRMC consists of approximately 800 beds and, in 2021, treated over 100,000 Emergency Department patients. With a 52-bed Neuroscience unit and a 20-bed Neurocritical Care unit, CRMC is home to one of the most sophisticated and comprehensive Neuroscience Centers in the state – the Bob Smittcamp Family Neuroscience Institute. Staffed with five Neurocritical Care physicians, seven Neurosurgeons, six Stroke Neurologists, fourteen Neuro Hospitalists, and twenty-eight Advanced Practice Providers, CRMC's Neuroscience Department provides unrivaled care in the Central Valley.

Rated a Top 10 place to live in California, Fresno has a diverse job market, an array of cultural attractions, and inexpensive housing (with a cost of living and median home price below the state average). The Tower District is famous for its artsy Rogue Festival, classic car show, and film festival, while beloved events like the Kearney Renaissance Faire take place on Fresno's west side. Additionally, low housing costs have triggered a population growth that has prompted the development of new recreational areas, nightlife venues, and an eclectic dining scene. There are plenty of days to enjoy the great outdoors, as Fresno's climate is typical of the San Joaquin Valley: warm summers and relatively mild winters. Fresno is a short drive from many national parks, including Yosemite, Sequoia, and Kings Canyon, as well as a short drive to Los Angeles, San Francisco, and the Central Coast.

Don't miss out on this opportunity to become a part of this vibrant community that has something to offer everyone.

No experience is necessary, as the department has extensive experience in training new graduates.
